

How to add kyocera printer on Mac

First thing to do is to contact IT department. We have to know your **login username** of your Mac in order to add your account into kyocera server.

After that, you go into your settings → Printers → Add printer

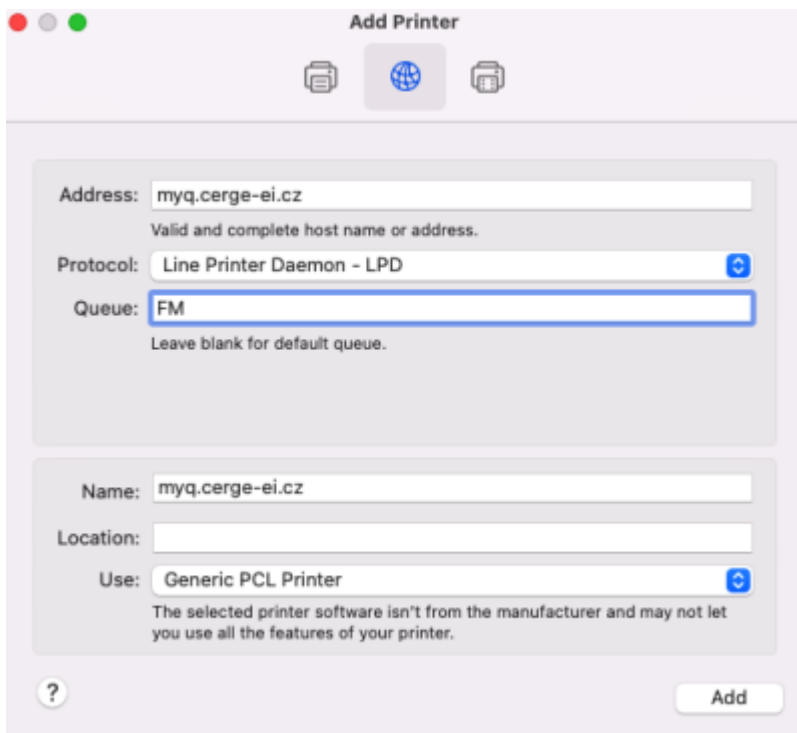

Address - myq.cerge-ei.cz

Protocol - Line Printer Daemon "LDP"

Queue - FM

Location - ***empty***

Use - Generic PCL printer

The screenshot shows the 'Add Printer' window in macOS. It has three window control buttons (red, yellow, green) at the top left. Below them are three printer icons. The main area contains several input fields and dropdown menus:

- Address:** myq.cerge-ei.cz (with a note: "Valid and complete host name or address.")
- Protocol:** Line Printer Daemon - LPD (dropdown menu)
- Queue:** FM (with a note: "Leave blank for default queue.")
- Name:** myq.cerge-ei.cz
- Location:** (empty field)
- Use:** Generic PCL Printer (dropdown menu, with a note: "The selected printer software isn't from the manufacturer and may not let you use all the features of your printer.")

At the bottom left is a question mark icon, and at the bottom right is an 'Add' button.
