

Instructions for adding a Kyocera printer to user stations

Important: notebook must be connected to WiFi residents !!! (libairfree WiFi is not supported)

Queue link: `lpd://myq.cerge-ei.cz/FM`

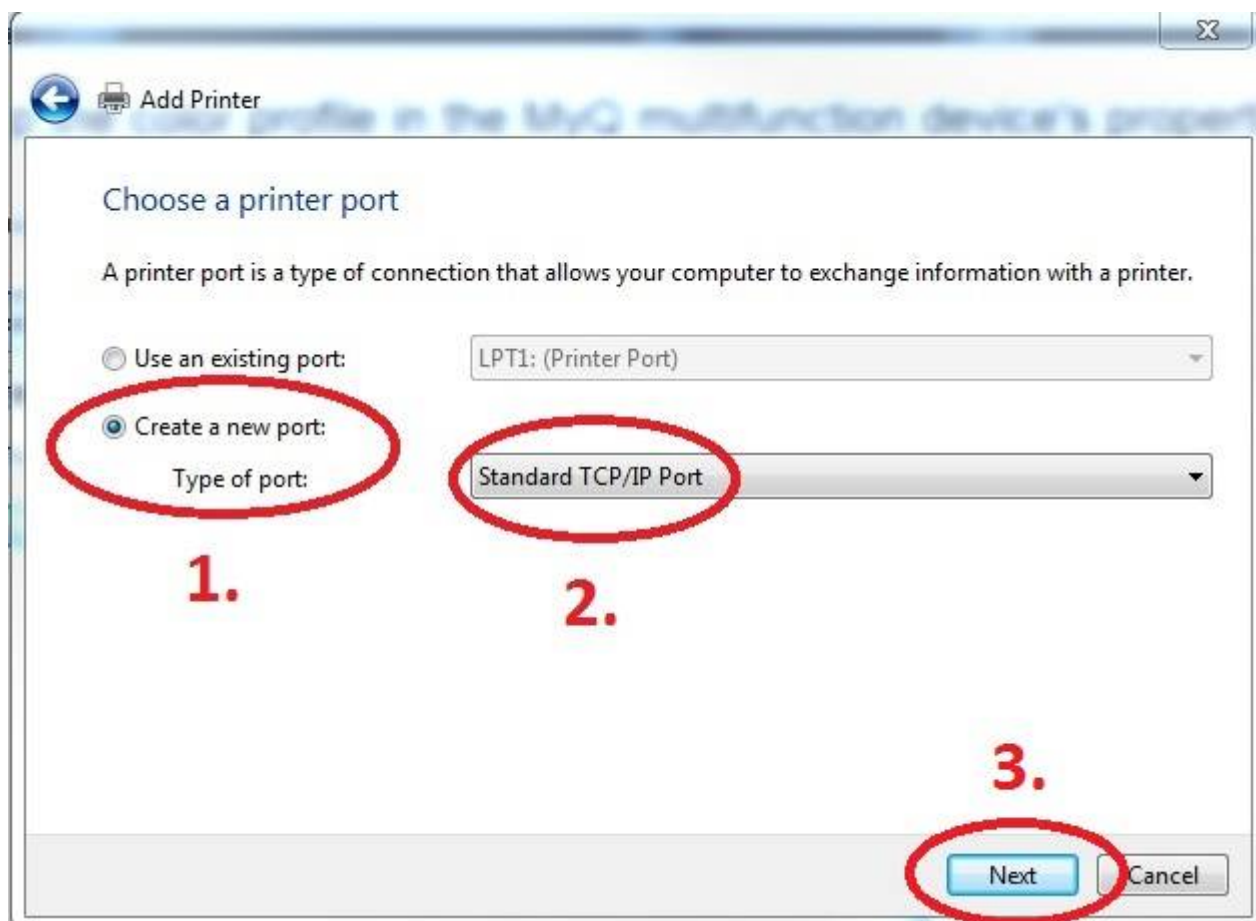

Press Start button → Devices and Printers → Add a Printer

Add a local printer

Create a new port: Standard TCP/IP Port

Enter Hostname - myq.cerge-ei.cz

The screenshot shows the 'Add Printer' wizard window. The title bar says 'Add Printer'. The main instruction is 'Type a printer hostname or IP address'. The 'Device type' dropdown is set to 'TCP/IP Device'. The 'Hostname or IP address' field contains 'myq.cerge-ei.cz' and is circled in red with a red '1.' next to it. The 'Port name' field also contains 'myq.cerge-ei.cz'. The checkbox 'Query the printer and automatically select the driver to use' is checked. At the bottom right, the 'Next' button is circled in red with a red '2.' next to it.

Customize Settings

Important settings (check twice)

- Protocol: **LPR**
- Queue name: **FM**
- [x] **LPR Byte Counting Enabled**

The screenshot shows the 'Add Printer' wizard window, Step 2: 'Additional port information required'. The text says 'The device is not found on the network. Be sure that:'. Below this are four numbered instructions. The 'Device Type' dropdown is set to 'Generic Network Card'. The 'Standard' radio button is selected, and the 'Custom' radio button is circled in red with a red '1.' next to it. The 'Settings...' button is circled in red with a red '2.' next to it. At the bottom right, the 'Next' button is circled in red with a red '7.' next to it. To the right of the main window is a 'Configure Standard TCP/IP Port Monitor' dialog box. The 'Port Name' field contains 'MyQ'. The 'Printer Name or IP Address' field contains 'MyQ' and is circled in red with a red '3.' next to it. The 'Protocol' dropdown is set to 'LPR' and is circled in red with a red '4.' next to it. The 'Raw Settings' section has 'Port Number' set to '9100'. The 'LPR Settings' section has 'Queue Name' set to 'FM' and is circled in red with a red '4.' next to it. The checkbox 'LPR Byte Counting Enabled' is checked and circled in red with a red '5.' next to it. The 'SNMP Status Enabled' checkbox is unchecked. The 'Community Name' field contains 'public'. The 'SNMP Device Index' field contains '1'. At the bottom right, the 'OK' button is circled in red with a red '6.' next to it.

Download driver and unzip it to the local folder (for example c:\driver\). Choose 32-bit or 64-bit version depending on your system:

- 32-bit driver

- 64-bit driver

Mac OS:

OS X 10.8 - 10.13

Mac OS X 10.5 and newer**

Press Have Disk... Navigate to the driver folder (for example c:\driver\64-bit\) and select "OEMSETUP".

Choose Kyocera TASKalfa 8052ci KX

Rename Printer and finish installation.

After installing the printer, send your local username on the notebook to

helpdesk@cerge-ei.cz and we will allow printing for your account.
