

# Configuration hints for mobile device

## Basic WiFi settings

|                 |   |
|-----------------|---|
| Network name    | 'residents'   |
| Username        | <i><b>your email address</b></i> (use lower-case letters only)  |
| Password        | <i><b>Use the password shown to you during registration</b></i> |
| Security type   | WPA2-Enterprise / 802.1X  |
| Encryption type | AES   |

## Other Connection Settings (if needed)

|                               |   |
|-------------------------------|---|
| Network authentication method | Protected EAP (PEAP, Microsoft PEAP)  |
| Certificate CA                | Do not validate / do not specify server certificate / accept certificate when asked (self-sign certificate is used) |
| Authentication Method         | EAP-MSCHAPv2 (Windows specific: disallow use of Windows logon and password)   |
| 802.1X Advanced Settings      | Authentication mode = User Authentication (enter and save your credentials)   |

## Usage notes

- You can use your WiFi access credentials for **all your devices**
- **Never give your credentials** to any other person!
- Each user must use his/her own credentials because of security rules and measures
- Please avoid any illegal network activities and always follow university rules
- If you lose your password you have to reset your account (use button **Reset password...** at the bottom of your registration page)
