# WiFi 'residents' - Configuration Hints

### **Basic WiFi settings**

<b>Network name</b>	'residents'
Username	your email address (use lower-case letters only)
Password	Use the password shown to you during registration
Security type	WPA2-Enterprise / 802.1X
Encryption type	AES

## Other Connection Settings (if needed)

Network authentication method	Protected EAP (PEAP, Microsoft PEAP)
Certificate CA	Do not validate / do not specify server certificate / accept the certificate when asked (self-sign certificate is used)
Authentication Method	EAP-MSCHAPv2 (Windows specific: disallow use of Windows logon and password)
802.1X Advanced Settings	Authentication mode = User Authentication (enter and save your credentials)

#### **Usage notes**

- You can use your Wi-Fi access credentials for all your devices
- Never give your credentials to any other person!
- Each user must use his/her own credentials because of security rules and measures
- · Please avoid any illegal network activities and always follow university rules
- If you lose your password you have to reset your account (use button **Reset account...** at the bottom of your registration page)
