

WiFi 'residents' - Configuration Hints

Basic WiFi settings

| | |
|---------------------|---|
| Network name (SSID) | 'residents' |
| Username | <i>your email address</i> (use lower-case letters only) |
| Password | <i>Use the password shown to you during registration</i> |
| Security type | WPA2-Enterprise / 802.1X |
| Encryption type | AES |

Other Connection Settings (if needed)

| | |
|-------------------------------|---|
| Network authentication method | Protected EAP (PEAP, Microsoft PEAP) |
| Certificate CA | Do not validate / do not specify server certificate / accept the certificate when asked (self-sign certificate is used) |
| Authentication Method | EAP-MSCHAPv2 (Windows specific: disallow use of Windows logon and password) |
| 802.1X Advanced Settings | Authentication mode = User Authentication (enter and save your credentials) |

Usage notes

- You can use your Wi-Fi access credentials for **all your devices**
- **Never give your credentials** to any other person!
- Each user must use his/her own credentials because of security rules and measures
- Please avoid any illegal network activities and always follow university rules
- If you lose your password you have to reset your account (use button **Reset account...** at the bottom of your registration page)
