

WiFi 'residents' - Windows 7 Howto Guide

Following screenshots will guide you through WiFi setting in Windows 7. Other versions of Windows should work almost the same.

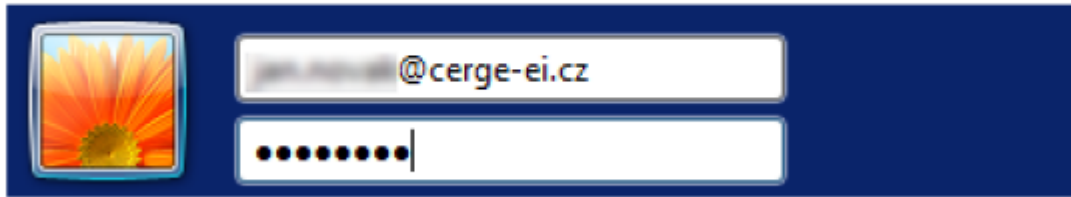

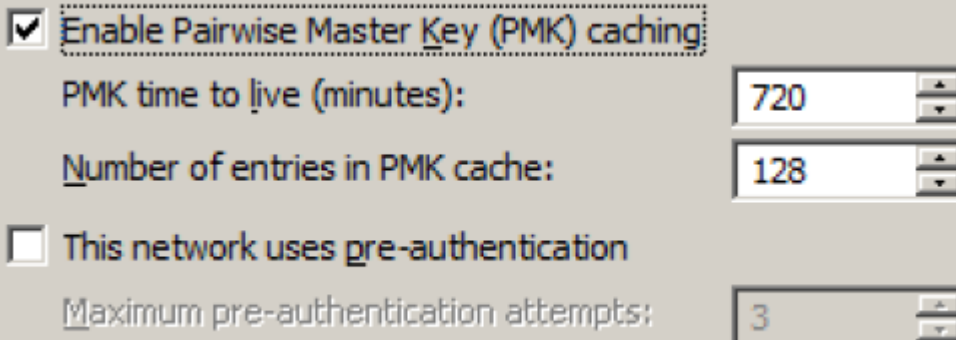

Replace credentials

Saving your credentials allows your computer to connect to the network when you're not logged on (for example, to download updates).

A screenshot of the Windows Network Setup dialog box. It features a blue header with a sun icon on the left. Below the header, there are two input fields: the top one contains an email address ending in '@cerge-ei.cz', and the bottom one contains a password represented by black dots. The background is a dark blue gradient.

A screenshot of the Windows Network Setup dialog box showing advanced options. The 'Enable Pairwise Master Key (PMK) caching' checkbox is checked. Below it, 'PMK time to live (minutes)' is set to 720 and 'Number of entries in PMK cache' is set to 128. The 'This network uses pre-authentication' checkbox is unchecked, and 'Maximum pre-authentication attempts' is set to 3. All values are in spinner boxes.

Select a location for the 'residents' network

This computer is connected to a network. Windows will automatically apply the correct network settings based on the network's location.

Home network

If all the computers on this network are at your home, and you recognize them, this is a trusted home network. Don't choose this for public places such as coffee shops or airports.

Work network

If all the computers on this network are at your workplace, and you recognize them, this is a trusted work network. Don't choose this for public places such as coffee shops or airports.

Public network

If you don't recognize all the computers on the network (for example, you're in a coffee shop or airport, or you have mobile broadband), this is a public network and is not

Set Network Location

The network location is now **Public**

Network name: **residents**
Location type: **Public**

To help protect your computer, network discovery of other computers on this network will be limited, and some programs might be
