

How to add kyocera printer on Mac

First thing to do is to contact IT department. We have to know your **login username** of your Mac in order to add your account into kyocera server.

After that, you go into your settings → Printers → Add printer

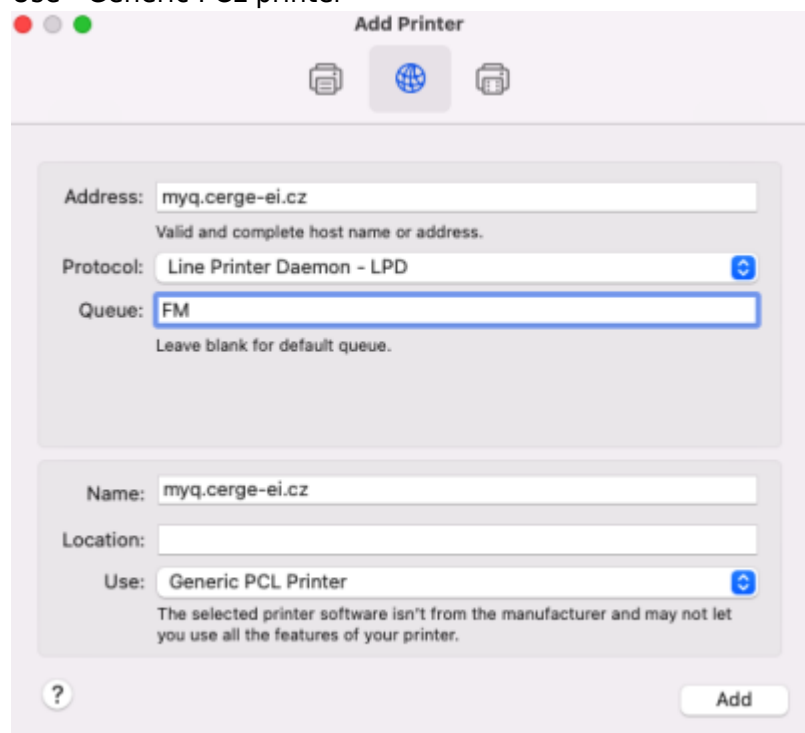

Address - myq.cerge-ei.cz

Protocol - Line Printer Daemon "LPD"

Queue - FM

Location - *empty*

Use - Generic PCL printer

The screenshot shows the 'Add Printer' dialog box in macOS. It has three tabs at the top: 'Printers', 'Network', and 'Web'. The 'Network' tab is selected. The form contains the following fields:

- Address:** myq.cerge-ei.cz (with a note: 'Valid and complete host name or address.')
- Protocol:** Line Printer Daemon - LPD (dropdown menu)
- Queue:** FM (with a note: 'Leave blank for default queue.')
- Name:** myq.cerge-ei.cz
- Location:** (empty field)
- Use:** Generic PCL Printer (dropdown menu, with a note: 'The selected printer software isn't from the manufacturer and may not let you use all the features of your printer.')

At the bottom left is a help icon (?), and at the bottom right is an 'Add' button.
