

How to add Kyocera printer on Mac

First thing to do is to contact IT department. We have to know your **login username** of your Mac in order to add your account into kyocera server.

After that, you go into your settings → Printers → Add printer

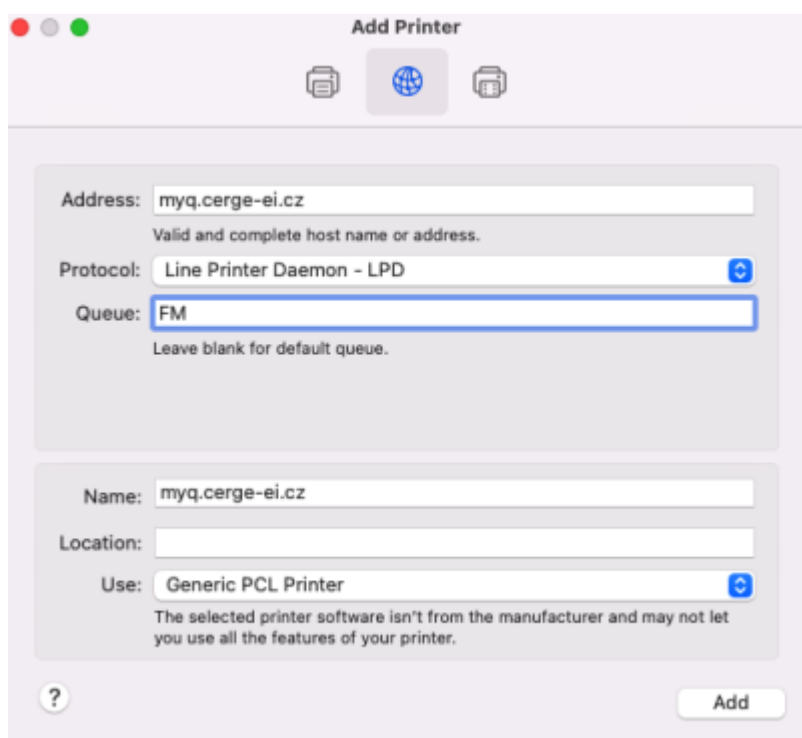

Address - myq.cerge-ei.cz

Protocol - Line Printer Daemon "LPD"

Queue - FM

Location - ***empty***

Use - Generic PCL printer

The screenshot shows the 'Add Printer' window in macOS. At the top, there are three icons: a printer, a globe, and a printer. Below these, there are two main sections. The first section contains the following fields: 'Address' with the value 'myq.cerge-ei.cz' and a note 'Valid and complete host name or address.'; 'Protocol' with a dropdown menu showing 'Line Printer Daemon - LPD'; and 'Queue' with a dropdown menu showing 'FM' and a note 'Leave blank for default queue.' The second section contains the following fields: 'Name' with the value 'myq.cerge-ei.cz'; 'Location' which is empty; and 'Use' with a dropdown menu showing 'Generic PCL Printer' and a note 'The selected printer software isn't from the manufacturer and may not let you use all the features of your printer.' At the bottom left, there is a question mark icon, and at the bottom right, there is an 'Add' button.
