

Instructions for adding a Kyocera printer to user stations

Important: notebook must be connected to WiFi residents !!! (libairfree WiFi is not supported)

Press Start button→ Devices and Printers → Add a Printer

Add a local printer

Create a new port: Standard TCP/IP Port

Enter Hostname - MyQ or myq.cerge-ei.cz

The screenshot shows the 'Add Printer' wizard window. The title bar says 'Add Printer'. The main heading is 'Type a printer hostname or IP address'. Below this, there are three input fields: 'Device type' (set to 'TCP/IP Device'), 'Hostname or IP address' (containing 'MyQ'), and 'Port name' (containing 'MyQ'). A red circle highlights the 'MyQ' text in the 'Hostname or IP address' field, with a red '1.' next to it. Below these fields is a checkbox labeled 'Query the printer and automatically select the driver to use', which is checked. At the bottom right, there are two buttons: 'Next' and 'Cancel'. The 'Next' button is highlighted with a red circle and a red '2.' next to it.

Customize Settings

Important settings (check twice)

- Protocol: **LPR**
- Queue name: **FM**
- [x] **LPR Byte Counting Enabled**

The image shows two screenshots from the 'Add Printer' wizard. The left screenshot is titled 'Additional port information required'. It contains a list of four steps to follow if the device is not found on the network. Below this list, there are two radio buttons: 'Standard' and 'Custom'. The 'Custom' radio button is selected and circled in red, with a red '1.' next to it. To the right of the 'Custom' radio button is a 'Settings...' button, also circled in red, with a red '2.' next to it. At the bottom right, there are two buttons: 'Next' and 'Cancel'. The 'Next' button is circled in red, with a red '7.' next to it. The right screenshot is titled 'Configure Standard TCP/IP Port Monitor'. It has several input fields: 'Port Name' (containing 'MyQ'), 'Printer Name or IP Address' (containing 'MyQ'), 'Protocol' (with 'Raw' selected and 'LPR' circled in red with a red '3.'), 'Raw Settings' (with 'Port Number' set to '9100'), 'LPR Settings' (with 'Queue Name' set to 'FM' circled in red with a red '4.', 'LPR Byte Counting Enabled' checked and circled in red with a red '5.', and 'SNMP Status Enabled' unchecked), 'Community Name' (set to 'public'), and 'SNMP Device Index' (set to '1'). At the bottom right, there are two buttons: 'OK' and 'Cancel'. The 'OK' button is circled in red, with a red '6.' next to it.

Download driver and unzip it to the local folder (for example c:\driver\). Choose 32-bit or 64-bit version depending on your system:

- 32-bit driver

- 64-bit driver

Mac OS:

OS X 10.8 - 10.13

Mac OS X 10.5 and newer**

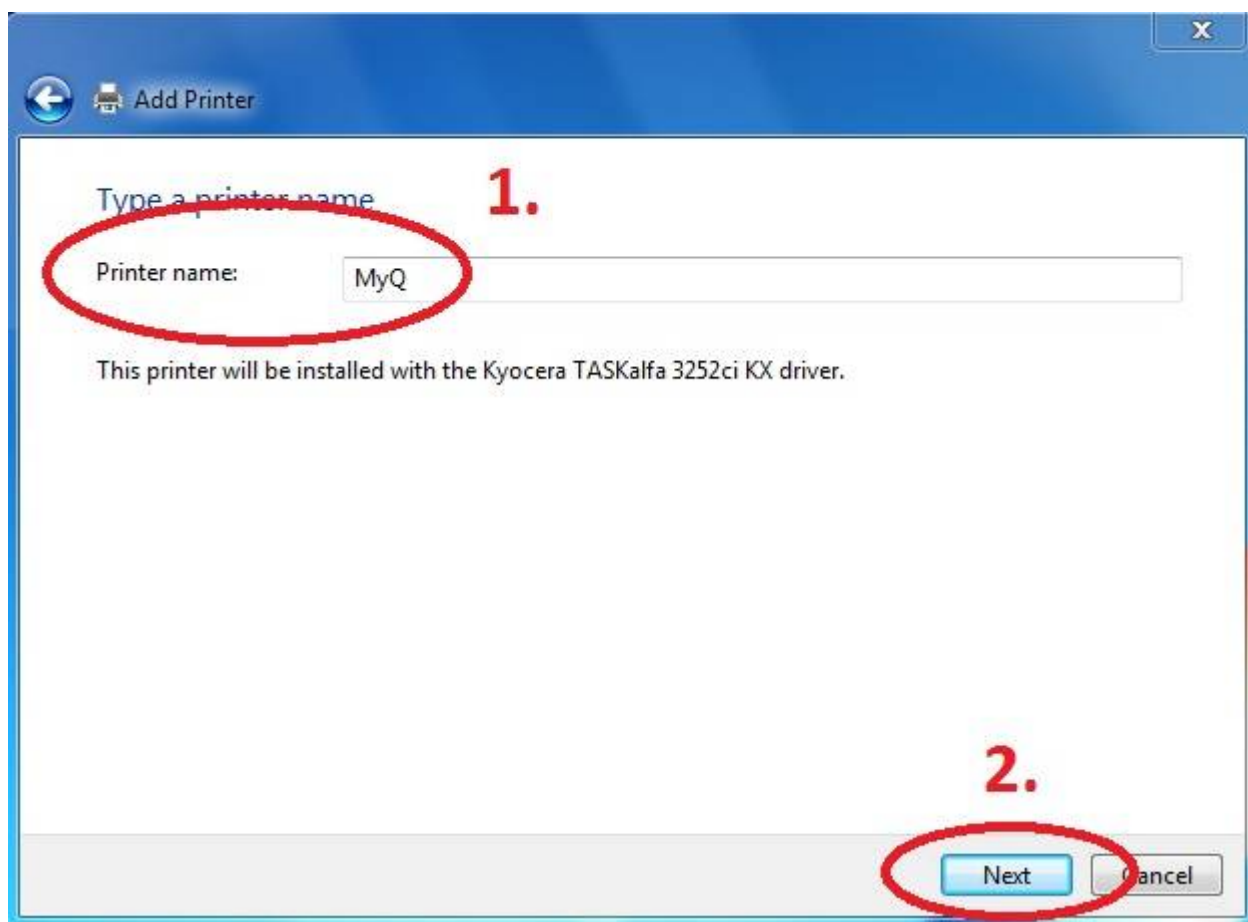

Press Have Disk... Navigate to the driver folder (for example c:\driver\64-bit\) and select "OEMSETUP".

Choose Kyocera TASKalfa 8052ci KX

Rename Printer and finish installation.

After installing the printer, send your local username on the notebook to

helpdesk@cerge-ei.cz and we will allow printing for your account.
